DINOCRATES CHAPTER OF U. OF TEXAS

HAVE ALL IN READINESS AS HOSTS OF

ALPHA RHO CHI'S THIRTEENTH CONVENTION

Arrangements Made for Validation of Winter Rate Tickets
Which Should Cut Annual Delegate Expenses;
San Antonio Alumni Arrange a Trip.

By Carl R. Olson, W. A.

The Dinocrates Chapter will be hosts to the Thirteenth Annual Convention of Alpha Rho Chi to be held in Austin December 30 and 31.

Plans have been under way for some time and are now practically completed so that it is believed the Texas fellows will furnish an example of how a convention should be managed. Everything is all set for a big time for the visitors and entertaining chapter.

It will be of general interest to the fraternity to know that there can be some saving of transportation expenses this year. The northern and eastern chapters can take advantage of All-Winter Rates from points north to San Antonio. "The Playground of the South," and as Austin is on the line to San Antonio can get off here without going on to San Antonio.

Buy Round Trip Tickets.
Likewise, the Adronicus delegate can secure an All-Year Tourist Rate from California to Austin and then a special Holiday Rate from Dallas to Austin. Round trip tickets will have to be purchased to get these rates and arrangements have been made with the road manager in Austin to have all such tickets validated there without inconvenience to the delegates.

The delegates from the north will probably route via St. Louis or Kansas City and catch the fast "Katy" (M-K-T) from either place to San Antonio, and we hope that many of the delegates will thus be able to become acquainted en route. There are two of these thru trains from St. Louis and Kansas City daily, one arriving in Austin late in the afternoon and one early in the morning.

The "Katy" leaves St. Louis Wednesday evening at 6:50 P.M., arriving Austin late Thursday afternoon in time to enjoy Thursday's entertainment and a good night's sleep before the convention rush of Friday morning. All men should so plan.

Accommodations for visitors have been arranged at the Stephen F. Austin Hotel and all meetings will be held there also. The first night, Friday, December 30, will be the occasion of a merry get-together in the form of a formal dance on the Austin Hotel roof. Most of the girls have been invited and it is expected that the reputation of Texas for its beautiful attractive and interesting women will be upheld by the fair co-eds who will make the dance the enjoyable affair that it will be.

The second evening, the traditional formal stag banquet, will be held and that also promises to be exceptionally good. The choice speakers of the fraternity have been selected for the occasion and the line will probably last late into the morning. Brother J. J. Patterson will be the principal speaker of the evening and will have a message that will never be forgotten.

Brother D. P. Ely, Worthy Grand Architect, has also consented to speak, and knowing him as we do, nothing further need be said. Brother Tousslely (no introduction necessary) will also be there with his usual supply of humorous stories and snappy news style for the entertainment and instruction of those present.

Simons, Dinocrates Sponsor, to Speak.
Brother Malcolm G. Simons, San Antonio, the man responsible for the formation of the Dinocrates Chapter, will make a short speech of welcome—or something along that line. Other short talks will naturally follow and everyone is urged to refresh his memory of good jokes and stories and help in making the banquet the most enjoyable affair of the convention.

Dinocrates Chapter is also planning an additional enjoyable treat for the visitors and wish to give it special emphasis so that none will miss it. Sunday morning, following the Convention, an automobile Trip is planned to San Antonio. "The Playground of the South," ninety miles from Austin.

San Antonio is the center of that romantic and thrilling history of the Lone Star State—Texas under seven flags. No
The exterior of the University of Texas Library, designed by Alpha Rho Chi's Master Architect, speaks for itself above. The interior contains hand carved paneled walls and grills, while the painted wooden truss roof is exposed to view after the style of the Church of San Miniato at Florence which inspired Brother Gilbert.

Other state, and probably nation, can claim a history so interesting, so romantic, so filled with thrilling battles and heroic struggles as Texas.

Visit to the Alamo Planned.

The setting at the story of The Alamo, where the brave Texans fought against overpowering odds until the last man was killed in the struggle for the independence of the Lone Star Republic from Mexico, will be visited in San Antonio as well as many others of historical interest.

Not only is San Antonio the most historic city in Texas but it is one of the largest and oldest and still retains its picturesqueness in spite of the progress of modern industry. Interesting examples of architecture will be found in the Spanish Cathedral, several Spanish Missions and other old buildings. A taste of Mexican life will be given the delegates by a trip through "Little Mexico" and a real Mexican dinner at the Original, the best eating joint in San Antonio.

San Antonio is quite a modern city also, containing many pretentious residences, modern office buildings, hotels and theaters. One theater in particular deserves mention. The Aztec Theater, built after the style of the Aztec Temples, is the most talked of theater in the South.

No more perfect reproduction of the colorful Aztec decorative elements and sculpture could be imagined. The exact reproduction of the Calendar Stone of the Aztecs, that unique and scientific method of counting the days and months, will be an object of much interest to architects.

The lighting effects are unusually effective and one is immediately transported back to the height of the wonderful Aztec civilization and finds himself standing before an Aztec temple in the pale moonlight with twinkling stars overhead and scattered clouds drifting lazily across the sky.

Cars will return to Austin in time for the delegates to catch the Sunday night train or those who have purchased their tickets to San Antonio may, at their own pleasure, stay over there for the evening and catch the train there. This side-trip is being backed and arranged by the San Antonio Alumni and there is no doubt but what it will be a highly instructive and enjoyable visit and every delegate is urged to remain over and take advantage of the unusual opportunity.

A last word to the delegates: Remember that the dance and banquet are both strictly formal. The hosts furnish the women and song—at least—and the visitors may bring whatever else (borrow if need be) belongs in their personal equipment for social success and a big time. We are working hard to make the convention a huge success and a source of everlasting pleasure and enjoyment to the visitors, so come prepared to help us realize that ambition.

TABLOID TEXAS TALES

(Continued From Page One)

to Texas, Aldridge Place, the scene of early Indian massacres, and the State Pasteur Institute.

Austin is a trade center for farm products and live-stock, and is noted for its brick and white lime manufactures. It ships more pecans than any other point in the South. Other industries are chili packing plants, iron foundries, and manufacturers of flour, cotton seed oil, engines, wagons, trucks, harness and saddlery, and food products. Population in 1920 was 54,876.
THE ARCHI

EDUCATION BUILDING ALSO BROTHER GILBERT'S

Dinocrates men feel this building is also exceedingly beautiful and are proud of it as a design of their “Big Brother.” The building is decorated by much hand-carved woodwork both inside and outside under the wide projecting eaves. Housed herein are the administrative offices and class rooms and laboratories for educational classes.

UNIVERSITY CO-EDUCATIONAL WITH TUITION FREE TO ALL:

The University of Texas is a co-ed institution established by the State in 1883 and comprises a college of Arts and Sciences, Graduate School, Summer School, and schools of Education, Engineering, Law, Mines and Metallurgy (at El Paso), and Medicine, including schools of medicine, pharmacy and nursing (at Galveston), and Extension Bureau, and a Bureau of Economic Geology and Technology. The University Summer Normal is intended to prepare teachers to obtain teachers' certificates.

The university is governed by a board of regents and tuition is free in all departments, the university being the head of the State public school system. It owns 540 acres of land, campus (40 acres) containing several buildings, the most recent of which are Engineering building (1904), Law building (1908), Library, (1910), and Education building (1918). The two latter buildings are products of Brother Cass Gilbert, Master Architect of the Fraternity.

The libraries contain the collections of the Texas Academy of Science and Texas Historical Association, the Wrenn collection of Chicago, Aitken collection of New York, and Garcia Library of Mexico City. Last year the University had an enrollment of fifty-five hundred with a faculty of over three hundred and sixty.

SAN ANTONIO A PLEASANT RESORT WITH INTERESTS:

San Antonio, the largest city of Texas, (population in 1920, 161,379) is located on the San Antonio about 50 miles southwest of Austin and 188 miles west of Galveston and it is served by five railroads, including the “Katy” and the Southern Pacific. It is built on a level plateau about 600 feet above sea level and covers an area of 36 square miles. The climate is said to be ideal with a mean average temperature of 69 degrees. The city is popular as a health and pleasure resort. The city is most noted for its beautiful parks and plazas, 52 in number, which cover nearly a thousand acres. In the suburbs are two hot sulphur springs which attract many visitors.

The Spaniards, under Captain Raymond, built a fort at San Antonio in 1689, but the first actual settlement was made in 1714. In 1718 the Franciscan mission of San Antonio de Valero was founded, and about the same time work commenced on The Alamo, “the cradle of Texas liberty,” in which in 1836, a small garrison, under Colonel Travis and James Bowie, for eleven days resisted the Mexican army under Santa Anna.

The city has been under no less than seven flags—Spanish, French, Mexican, Mexican Charter, Texan, Confederate and United States, while eight battles were fought in or near it between 1776 and 1836. It was the headquarters of one of the divisions of the Confederate army during the Civil War. The city was the base of supply for the United States army sent to the borderline of Mexico during 1912-1913.

Features of special interest are the City Market and Convention Hall, the Public Library, the historic Alamo, the old missions of San Jose, Conception, San Juan, and Espada; the San Fernando Cathedral, City Hall, Federal building, Headquarters of the 8th U. S. A. Corps Area, Japanese Tea Gardens and Lily Pond, and a number of excellent hotels. The U. S. Brigade Post, Fort Sam Houston is just outside the city with a parade ground covering nearly 2,000 acres. Kelly Field No. 1, the largest aviation field of the United States army, Kelly Field No. 2, a large aviation training school, and Brooks Field, the site of the United States Governmental Balloon school, are located at San Antonio, and during the World War, Camp Travis and Camp Stanley were established there.

NOTICE TO CHAPTERS

The 13th Annual Convention of the Fraternity will be held on December 30 and 31, 1927, at Austin, Texas. It is anticipated that the delegates will arrive on Thursday evening, the 29th. The M-K-T Texas Special leaving St. Louis Wednesday, December 28th, at 6:50 P. M. and arriving in Austin at 7:00 P. M., Thursday, will be convenient to a number of the delegates. Winter tourist tickets to San Antonio or Dallas will probably be found the cheapest fare to Austin. Arrangements have been made to have tickets validated by the station agent in Austin as a motor trip to San Antonio is planned for Sunday, January 1. Tourist tickets provide a choice of routes either going or coming.

Enclosed are blanks for Convention Report and Delegate Credentials for an Active and an Alumni Delegate. Care should be taken that these are signed by the proper chapter officers and the chapter seal affixed. Do not neglect to bring your chapter's copy of the Fraternity Constitution and By-Laws with you.

D. P. Ely, W. G. A.
Columbus, Ohio
December 1, 1927.

From The Editor's Mail Box

Wherein We Recount Things and Thoughts
Which Come To Our Attention.

We recently received word of the organization of the Demetrios Alumni association from Bro. D. P. Ely, W. G. A. For the benefit of those who may not understand the difference between an Alumni Association and an Alumni Chapter, the former is purely a chapter affair and the association serves as a business body or holding organization to care for chapter houses and other property, while the latter is an alumni social organization open to members of all chapters located in a given locale. Officers of the Columbus Alumni Chapter are the same as for the Demetrios Alumni Association in this case.

Speaking of the convention reminds us that the term of Bro. Harold R. Peterson expires this trip. A little while back we heard from "Pete" with a batch of scholarship reports received by him. If ever a Grand Council officer has been buried on the job it has been the old warhorse Peterson. We all thought he had heard the last from him.

However the latest word from him reveals that he has been working on a particular prospect down East which struck a snag when his agent left no forwarding address and mail was returned. But we were telling of Pete's being buried. We can understand that for your editor is in a similar capacity, where hours are unlimited at times. How one longs for an office job sometimes with specific hours, unaffected by weather or other unforeseen demands.

Pete Takes Breath

As The Archi has previously advised, "Pete" is a resident engineer for the N. P. on some lumber line branches in Idaho. He writes in part: "We have the line practically completed now and are hauling trainloads of white pine from the forests to the mills every day. Following months of overcrowding mental and physical strain, I now have my breathing spell with office work and records to complete with some field work. "This job has been a tough one for branch line construction. I am sure there is no other branch line like it in the country, in fact it has cost more per mile than the greater percentage of our main line track.

"The new line was constructed 26 miles up a very narrow and rugged creek canyon, in which we had to build 36 bridges, crossing over the creek besides
many channel changes to eliminate other bridges. I have had charge of the construction of 55 timber bridges and two concrete and steel bridges on another branch line here, so I have learned a little about timber bridge construction.

Scholarship Varies Some

"Give my regards to any of my acquaintances you may see, including "Ham" Hamnett of Chicago. I suppose he "'otes a gat" like all the other Chicagoans now; give him my regards and tell him he owes me a letter, although I do not know that he does."

"Was up to Pullman recently to see Idaho and Washington State play. Both before and after the game I tried to get in touch with Fred Rounds, Anthemos, but was unable to do so. I noted from the faculty directory that Ogge Bee- man, Mnesicles, is not there any more."

Turning to the scholastic reports in hand, Texas stands at the top of the list of fraternities at that institution with a mark of 7.21 where the average is 5.53. At Minnesota in the engineering college Mnesicles ranked last out of five architectural and engineering fraternities with a mark of 1.149. The highest in the college was 1.373, while the professional average was 1.313 under the Gopher system of scoring.

Last Is Married

At Illinois, Anthemos ranked fifth in eleven professional fraternities with a mark of 3.364 a gain of .176 over the previous semester. High for the professionals was 3.936, while the average was 3.399.

Received word recently from O. D. Lantz, Paeonios '27, and retiring W. A. Meyer's office boy and scene dock cataloguer. Letters from O. D. Lantz, Paeonios '27, and retiring W. A. Meyer's office boy and scene dock cataloguer.

Brother J. Martin Frissell, our "Dyke-jumper," Inade a visit to Holland, Belgium, and the Netherlands. "Red" is inclined to be backward about telling the choicer parts of his adventures, so we gather from what he tells that he must have had a glorious time. He brought back some clever sketches; they are dace good, but there aren't many of them. That shows he did other things besides sketch!!!

"Red" isn't the only one of the boys who saw the "Free countries, though. Brother J. Martin Frissell, our "Dyke-jumper," made a visit to Holland, Belgium, and France. "Friss" brought back some clever books on modern art and architecture as they see it in Holland. He also brought back one "objet d'art," but I can't tell you about it—less said about it the better. Any how, "Red" says, quoting Robert Benchley, that every time "Friss" saw a dyke he cheered.

Then too, Banquier Aubrey went over to Europe somewhere. I can't tell you anything about his trip, because one can stand just so much of this "I'll tell you what I did on my vacation" talk, and say, can he play tag with the wilds of Canada, (or maybe it's Windsor). But say, can he play tag football; he's busted one rib already. Larry Plym is one of those fellows who don't shout and dance in the glare of a spotlight, but just forms an indispensable part of the background. Larry was a Phi Gamma Delta at Illinois. We like Larry because he is a gentleman—you know, so different from most of us here at Michigan.

Pete Pierce is just Pete Pierce. No use trying to explain him or the things he does. He's from Canadaguia, New York.

Clifton Hoskins hails from "sunny" California, and is experiencing his first
taste of snow-balls. Already, with the warm weather we have had, he is home sick for the warmer climate. "Cliff" looks a lot like a Phi Beta Kappa, or at least a Tau Sigma Delta before he finishes here.

As I said, you're apt to hear big things of these boys some day, and we hope you other chapters took in as good pledges as we did.

MNESICLES—MINNESOTA
Lyle C. Nelson, Correspondent

Myron J. ("Mike") Dassett, Ex '17, recently received his diploma from the Beaux Arts School of Design in Paris.

Brother Cass Gilbert, Master Architect, initiated by Mnesicles, has presented the chapter house with a valuable antique chest of the period of Charles I. The chest measures five feet by two and a half feet. It is occupying a place of honor in the library. A gift such as this is certainly to provide inspiration, both in architecture and good fellowship. Our sincerest thanks to you, Brother Gilbert.

Our bowling team captured the professional fraternity bowling cup without much competition. They are now arranging to meet the Academic fraternity champions to settle the All-U dispute. They will also make a strong bid for the Big Ten Intra-Fraternity Cup. Harold Fridlund, Paul Jones, Hugh Eaton, Lyle Nelson and Leonard Melkus compose the team.

Porter Kilpatrick left the Chapter House early in November to work in Grand Forks. He reports that he likes his position and at present is designing a Sorority house.

The Scholarship Cup for last year's Freshman class was awarded to Leonard Melkus, who not only stood high scholastically, but was very active in the chapter.

It has been rumored that "Chet" Carjola has "missed" placed his pin.

George Fraser, '19, a third year fellow in architecture at the American Academy in Rome, is planning to draw out the recently excavated baths at Leptis Magna in Tripolitania. He is planning on living with the excavators at the site.

Dudley Bayliss received the Faculty prize of $15 in books for having the second highest general average last year.

Merrill Madsen, and the former Miss Jemima Walters are honeymooning in the South.

Saturday, January 7, the Winter Formal party will be held at the Chapter house.

Initiation will be held early in the winter quarter. A class of about ten men will be preparing to wear the ARC badge.

KALLIKRATES—VIRGINIA
L. L. Scrithner, Correspondent

Time is drawing nigh for the annual Beaux-Art Ball given by the Architectural school and sponsored by Alpha Rho Chi. Much work has been done; decoration and costumes are the leading topics around the drawing lab.

The date for the Ball has not been set, but is thought that it will be somewhere around March 25th. There is anticipation of a greater success than that of last year. Dean Campbell has already assured Kallikrates of his cooperation and his interest has placed the whole school behind the undertaking.

On November 18th an informal supper was held for the new pledges. With this new material Kallikrates is looking forward to a bigger and better year.

ANDRONICUS—U. S. C.
Harold L. Glascoe, Correspondent

There is talk of a dance at Brother Thomas' home. This has not yet been confirmed, but we are all hot for the dance.

November 5 marked the date for our formal initiation of Mr. Spaulding, as an honorary member. At noon the alumni chapter gave a dinner in honor of Mr. Spaulding. The initiation followed the dinner and that evening the active chapter gave a banquet to our new brother; the event was held at the Jonathan Club at Los Angeles.

Brother Baden, '27, has left the wilds of the north for the summer and has now been lined up with Brother Spaulding of Los Angeles.

The evening of November 7, was the date of an exchange dinner between the Alpha Delta Pi; Sorority and the Alpha Rho Chi men, followed with a dance.

Our mothers and fathers held a bridge party at the fraternity house on Wednesday evening, November 16, and it surely was an honest-to-goodness get-together party. It proved a great success. Refreshments were also served.

PAEONIOS—K. S. A. C.
B. K. Brown, Correspondent

A. F. Freeman represented the Paeonios Chapter on the K. S. A. C. football team the past season. He played tackle and was a power of strength to the Aggie line. Freeman is heavy, fast, and can carry the ball as well as punt it. Next season Freeman will be shifted to the back field where he will play fullback. It is his first year on the team and we predict great things for him in the future. Freeman is also out for basketball.

George Jelinek is the other athlete from Paeninos. George is a basketball player, and a good one too. This will be his first year on the team and we are expecting great things from him. He is a forward and has a wicked eye for the basket.

Bob Osborne, another basketball man, is not in school this semester, but he is hoping to have him with us next semester. Bob is a forward and is a two letter man in that sport.

Homecoming was November 19th and we sure had a great time. Among the men "home" were: O. D. Lantz, Kansas City; C. H. Cless, Rossville; W. H. Cranes, Winfield; H. W. Harts and Ben Haxton, Lyons; H. H. Payle, Otsawatonic; Fred Marshall, Wichta; W. H. Koenig, New York, and William C. Kerr, Miami, Florida.

DINOCRATES—TEXAS
Mike Melbome, Correspondent

The Thanksgiving grid classic of the South, between Texas University and Texas A. & M., ended a rather unsuccessful season for the "Texas Boys." Returning home from this little vacation brings us all to the home stretch of four weeks to the Christmas holidays and the coming convention.

Everyone is talking of the convention, committees are buzzing, and under the able direction of "Papa" Carl, we plan to make the 13th annual Alpha Rho Chi convention the luckiest of all.

Brothers Kriegel, Murchison and Wylie were recently elected to Tan Beta Pi. Seven of our actives have attained this distinction.

Brothers Cato and Wylie have been on the sick list for the last month. Our dimmutive Roman has been laid up with the mumps, while Orval Lee runned a perfectly good ankle and will be on crutches for several weeks.

Brother Jessen "does right well" in his design, having bagged a first Mention and a second Medal this season.

After pondering a long while Dinocrates has at last taken another step forward, that of becoming mutually exclusive. We will now be admitted to the Inter-fraternity council.

We had the pleasure of a visit from Brother Simmons of San Antonio, the other day, who came over to complete the plans for a trip to S. A. for the convention delegates.

Weissman, an arts and craft club of recent organization, promoted by Brother S. C. P. Vosper and Kindred McLeary, is arousing considerable interest among the boys. Work done by this club is to consist of etching lithography, modelling, woodcarving, screen painting, murals, batiks and all other subjects of interest in the arts and crafts.

POLYKLITOS—CARNEGIE
William O'Neal, Correspondent

Lee V. Twophy, our W. A. for last year, was drowned on June 11, 1927. He was one of the most brilliant men in design in his class, and he was especially brilliant in water color and ink rendering. His loss is keenly felt both in the fraternity and in his classes, for he was always ready with suggestions and he was always ready to help carry them out.
Our W. A., Rod Jones, is planning a two months trip to Yucatan to study the Mayan ruins there. He expects to leave in two weeks, and although he is busy on a charette now, he doesn't seem to mind it, but then who would, who was going to Yucatan the next week? When he comes back we expect to hear many reports on ancient architecture and other things such as modern drinks, etc.

Here is the current list of Chapter officers: Roderick Jones, W. A.; Harold Shuttles, W. A. A.; Robert Batch, W. S.; William O'Neal, W. C.; and Harry Bissel, W. E.

THRON—O. A. & M.
William Tinkham, Correspondent

Brother and Mrs. Ralph McKee were our Alumni guests on homecoming day. Brother Redding just returned from a football trip to Minnesota. He visited the Mnesicles chapter and was very much impressed over their new home. McVay and Tinkham have been chosen to represent the Chapter in the Ford derby from Stillwater to Norman, November 17. Although there are some forty-six puddle-jumpers entered, both feel confident they will win the coveted prize of five reserved seats on the 50-yard line.

HISTORICAL OLD MAIN BUILDING

The first building of the University of Texas, began in 1882 and finished in 1899, is situated at the summit of campus hill, with a beautiful approach from the campus entrance, and is now used for offices, consulting rooms, reserve library and a few laboratories and class rooms.
