The Public and Architecture
By DWIGHT P. ELY, W. G. A.

This is not a new subject and it will probably occur to our readers immediately that they have heard it discussed many times. Nevertheless it is an important subject and under present conditions of acute revival in attention to the public's demands it becomes increasingly important. The question may immediately arise, "Why do we touch on this point in the columns of The Archi, whose policy has always been to touch on fraternal rather than professional subjects?"

Well, we must admit that the student of today is the practitioner of tomorrow and abiding by Alpha Rho Chi's established policy of operating to aid and reinforce the study of Architecture, can we not under this policy devise means to help the student and the young architect to better prepare himself to practice?

It may or may not be true that architects have, in their zeal for high standards of craftsmanship, ignored the ability of the public to absorb these standards. It may or may not be true that architects have stressed design and ignored economy and sound business practices. We do not make any statement here as to the truth of either one of these propositions but we believe there is still some lingering prejudice in the minds of the public along these lines although admittedly the public is warmer toward the architect than, for instance, ten years ago.

With all this discussion as merely an introduction to the possibility of definite action, would it not be an advantage to our younger members if we could investigate more carefully what the public asks of the architect? When the potential builder employs the architect what, exactly, does he expect to get for his fee? If our Fraternity had an exact and discriminating answer to this question we would not have something which would be valuable to the profession which we are connected and would we not have something which could be incorporated in our national policy so that Alpha Rho Chi could more nearly realize its ideals of assistance to the student of Architecture and to the profession?

In order to give this idea impetus the Grand Council is offering to our membership two prizes of $25.00 each, one available to active members and the other available to members no longer active. These prizes will be awarded in each case for the best paper or report based on the question "What does society ask of the architect?" The committee to make the award will consist of W. A. Taylor, New York; T. J. Strong, Urbana, and Graham Latta, Los Angeles.

Entries should be sent to the office of the W. G. A. not later than September 1. Papers submitted should not exceed 1000 words.

Professional Fraternities

The Professional Interfraternity Conference has announced a new booklet entitled "Professional Fraternities." This booklet is a pocket size and contains a brief history of the American college fraternity system, and of the establishment of professional fraternities. It contains chapters on relationship to the faculty, objects and benefits of professional fraternities, the choice of a fraternity, alumni activities and relations, and responsibilities of membership. There is a brief statement regarding the organization and objectives of the Professional Interfraternity Conference, a directory of Conference members and history of each. These booklets are sold in quantities of fifty only for $1.50. Each chapter should have a supply on hand for prospective members. Order direct from H. G. Wright, Secretary P. I. C., 222 West Adams St., Chicago, Ill.
Looking Forward
By CLIFFORD H. JAMES, W. G. E.

OVER 22 years ago, Alpha Rho Chi was founded jointly at the University of Illinois and the University of Michigan. Worthy purposes formed its foundation. Loyal Brothers built the structure chapter by chapter until the "Arch" spanned 10 chapters in as many states. The Banner with the words, "Fidelitas, Amor et Artes," waved proudly over all, proclaiming an ideal of fellowship among the architectural students in the universities and colleges of America, and the aim to combine their efforts so that the younger members of the profession might be of greater service to Architecture and its allied fields. Our House was not built on sand.

Seven years ago, a great economic flood swept through the country, destroying many institutions; lashing at individual and State alike; throwing fear and panic into the life of a nation.

One of the first to feel the blow, the building industry dwindled and wilted and pulled architecture with it in the crash. With practicing architects looking desperately for any sort of work, students were discouraged from studying architecture. Those who entered colleges of architecture could find very little money for fellowship among the architectural students in the universities and colleges of America, and the aim to combine their efforts so that the younger members of the profession might be of greater service to Architecture and its allied fields. Our House was not built on sand.

But the alumni can now breathe a little easier, and should again interest themselves in the Fraternity. Actives can now be more encouraged in their outlook for new material.

The Fraternity needs rebuilding. The alumni must help.

Now, not tomorrow, is the time to start. All good Brothers should get together in their respective chapters and work constructively. Let us begin an expansion program to put Alpha Rho Chi in every school where we can do good and serve the profession.

Every active chapter should be more optimistic about the future. Architecture is still a great and needed profession. Let every member be loyal to Alpha Rho Chi and determine to do his part toward making his chapter a strong unit in the Fraternity structure. Remember that we are a social fraternity, but limit our membership to students in architecture and the allied professions. This is one of our best features, and should be stressed. Let us maintain high scholarship, and a solid financial condition.

Look back at the past as a measure of progress, not as something to sigh for. Let us turn to the future, ours to do with what we will.

Again the song of Alpha Rho Chi will beat in our hearts as we roll up our sleeves and prepare to build a greater, stronger Alpha Rho Chi.

α α α

Alpha Rho Chi and Architecture

THE organization and history of Alpha Rho Chi revolve about two general but distinct points.

In the first place, as related recently by Brother Lorentz Schmidt, "The Fraternity had its beginnings at Illinois in 1912-13 among a group who felt the need of an organization which would support the architectural faculty and school." Similar feelings were motivating at about the same time the organization of Sigma Upsilon at Michigan. In other words, the Fraternity was founded "to encourage a greater interest in the study of architecture."

The second point to become a part of our credo is that each chapter of the Fraternity needs a home where its members can meet freely for the improvement of both their social life and of their study and to which they can return in later years.

Alpha Rho Chi, in other words, is a student organization designed to contribute to the study of Architecture and all that contributes to Architecture. It is the outgrowth of an apparent need for a closer relationship among students of Architecture. This method of operation is based on the fact of this need and on nothing else.

If anyone should feel that Alpha Rho Chi is no longer needed or that it has lost its appeal, it must be that we are failing to make a proper contribution to the study of Architecture or else the contribution which we are making is not getting proper publicity and support.

We must bend our efforts therefore toward strengthening that support to Architecture for which the Fraternity was founded and then toward obtaining the support of architectural education in return.

Dwight P. Ely, W. G. A.

Chicago Alumni Want Your Address

Many members of the Chicago alumni group have migrated to Washington, D.C. The Chicago directory file is kept by George W. Wegner, c/o Building Construction Company, 160 North La Salle St., Chicago, III. If you live in Chicago or have occasion to visit there, get in touch with the Chicago group.

FIRST BUILDING AT UNIVERSITY OF SOUTHERN CALIFORNIA
The University of Southern California

In 1880 the city of Los Angeles was little more than an overgrown Spanish pueblo with a few thousand citizens. In that year the University of Southern California was founded. The city has grown until it ranks first in motion picture production, oil refining, and aircraft manufacture; second in the production of tires and automobiles. The university has grown into one of the leading academic institutions of America with twenty-four schools and colleges and approximately fourteen thousand students during each school year.

Since the university is located but three miles from the downtown district, it has all of the advantages of a metropolitan university. The campus consists of twenty-five acres and adjoins Exposition Park, which was the location of the 1932 Olympic games. Located near the industrial and recreational centers of the Southwest, the University of Southern California offers many opportunities found in no other institution in the country.

The study of architecture at U. S. C. offers an interesting approach because the city is new and is growing rapidly. An effort is made to preserve the Spanish atmosphere and the warm, dry climate allows for more freedom in the expression of a style. In writing programs for design problems, every effort is made to have the requirements in keeping with local conditions.

Aside from the courses offered in the College of Architecture and Fine Arts, other outstanding schools are government, law, religion, dentistry, commerce, international relations, engineering, and medicine. The faculty numbers approximately five hundred.

In keeping with the ideals held by Dr. Rufus B. von KleinSmid, president of the university, a distinctive cosmopolitan atmosphere is maintained on the campus. Many exchange scholarships are granted to students of foreign universities. In a recent survey, it was found that every state in the union had students at U. S. C., and all but two small foreign countries were represented in the student body.

Particularly noted have been the athletic activities of the university. The nationally known coaching staff of the university has produced many All-Americans and world champions. Especially is the administration of the university interested in extra-curricular activities as a means of expression of initiative and leadership.

Students' activities and the campus social life are dominated to a large extent by the fraternities and sororities.

The democratic spirit of the campus was demonstrated by two events which occurred recently. In order to raise funds, women students held Taxi Day. They got hearses, trucks, old and new automobiles—anything on wheels—and took students and faculty to classes or home for whatever the passengers wished to pay. Francis Bacon, counselor of men, rode across campus in an ambulance which was jammed with a bevy of coeds. When he dismounted, he offered a dollar, and the female driver said, “Oh, dean, I think I will kiss you!” Luckily the dean escaped with his dignity. Later in the day the president of the university was seen riding in the rear of a bread truck.
Meet the Worthy GrandEstimator

CLIFFORD H. JAMES, Dinocrates, was born September 27, 1911, at El Paso, Texas. While a sophomore in high school, a “Pencil Points” story of the Alpha Rho Chi convention at Virginia suggested to James that a goal to strive for would be an Archi membership. Following his graduation from El Paso High School in 1929, he worked in the office of Frost and Frost, Architects and Engineers, until the fall of 1930. He spent two years at Texas “Tech” and transferred to the University of Texas in 1932, being graduated with a bachelor’s degree in 1934, and receiving his master’s degree in architecture in 1936.

Member of Tau Sigma Delta, Sphinx, a local professional architectural society, Association of Student Architects, Texas Interfraternity Council, the American Institute of Architects, secretary of Austin Branch of the West Texas A. I. A. chapter, winner of the Alpha Rho Chi Medal in 1935.

James served as Worthy Architect of the Dinocrates chapter from February, 1934, to June, 1936. He was a delegate to the Illinois convention in ’34. Visited seven chapters of Alpha Rho Chi in 1933 and 1934.

Brother James has been practicing architecture since 1932, decorating interiors, doing murals, oils, water colors and writing poetry, when not going to school. Not a stylist in architecture, believing that no “style” can ever solve all problems.

The Fraternity is fortunate to obtain Clifford H. James, “A true stone in the Arch,” who is so excellently qualified to assume Harold L. Parr’s duties. To Brother James, the Fraternity—including both local and national officers—pledge full cooperation as he enters into a new rôle as national Grand Council officer of Alpha Rho Chi. “Thine Arch shall never fail.”

News from “Andronicus Astonisher”

TO WARM Andronicus’ new house at 710 W. 28th Street, a gang of alumni turned out at the last meeting, overthrew tradition, and voted to collect dues to replace the informal financing of past year. Space prohibits listing the fourteen men who paid at the meeting, their promptness enables us to pay the new Grand Council dues immediately, the first Alumni Chapter to do so.

At least half a dozen 1936 marriages have not been posted yet, starting last January 4 when Ray Stevens and Barbara Dolan of Sacramento were married.

Whit Smith and Virginia Hill were married in Pasadena June 2.

Franklin Crosby and Marjorie Oakley chose June 4 and the 18th was selected by Mel Garton and Mary von Schrader. Karl Erickson is also married and is living in Chula Vista.

BANQUET IN WASHINGTON

Ros Allison, of Honolulu, is back on the mainland and is building a home, and one hears rumors that Bill Jenney of Paris and Rome is also somewhere about. Eddie Abrams, of Bogota, Colombia, is in Mexico at last report, and Johnny Cooke, arriving home via Mexico City, reports attending an APX banquet in Washington with 35 present.

The Patrick news, promised in the last Astonisher, is a girl, while the Madbrides have a son born October 2.

Jud Steele is manager of an architect’s office in Visalia.

Kirk Martin hiked from Mammoth Lakes to Yosemite and back.

Frank Green and Carl Denney are in their new homes.

The new president of the Glendale Art Association is Lyman Bossman, who has some swell water colors to show for a trip to Mammoth Lakes. The old Alumni employment grapevine seems to have changed from a way to find a job to a method of locating an available man. Happy Days!

ATELIER

After feeling the want for many years, Los Angeles at last has an Atelier again. The A. I. A. and Beaux Arts have given it their blessing, and APX Alumni are invited to drop in at 821½ Santee Street to nigger or crit. Brother Winslow is the patron. In solving Prof. Baldwin’s inspired program for a dual-purpose bath room for a constipated architect, Winslow won first place. Latta, who had recently worked under Winslow on a church job, was given second award, but when the jury couldn’t find him (not having looked in the life room) to present the prize, Dixon was picked as alternate. Louis also got his training under Winslow on the Chapman Chapel.

CHRISTMAS CARDS

Hand made Christmas cards have long been a hobby of many of the gang. Most difficult problem is always that of getting a new idea each year. Bob Peterson takes the prize this year with the idea of letting the receiver pay the postage.

Larry Gentry wrote from Carmel to report that Tom Shive is working with him in the swanky atmosphere of the Hotel Del Monte. (Not bus boys, you dopes, there is a thriving architect located there.)

WINCHELL

Barbara and Ray Stevens became proud parents on January 28. It’s a boy. Their new address, 101 Point Lobos Avenue, San Francisco.
To give a working center to the old employment grapevine, Ed Hoedinghaus is establishing a job file of all APX men. Ed’s position in the University Alumni Bureau of Employment gives him an inside line on what’s going on.

**YARRUP**

Bob Button, celebrating his graduation this month, is leaving for a year and a half in Europe.

The Mexican lure claims Curt Bowman and Louie Dixon as its latest victims. Next summer is the scheduled time.

Word has just come that Franklin Crosby’s wife passed away Wednesday, January 13. The sympathy of all the brothers goes out to school this year.

Fred’s position in the University Alumni Bureau of Employment gives him to Frank.

To give a working center to the old employment grapevine, Ed Hoedinghaus is establishing a job file of all APX men. Ed’s position in the University Alumni Bureau of Employment gives him an inside line on what’s going on.

**News of the Old Roommate**

William W. Anderson, ’33, now located in Jefferson City, Mo., with the Missouri Planning Board, is the proud papa of a baby girl, since October 18, 1936. The name—Margaret Landau. Bill was unable to attend the Anthemios homecoming because of a convention of city planners he had to attend in Detroit. Bill deserves a lot of credit, also his wife, for getting out the directory.

John O. Borgeson, w’33, the very jolly Swede, returned. With “Chuck” Wedberg also back, it was just too “sweede” for words.

Frederick P. Cole and his wife have returned to live in Champaign, after residing in Indianapolis for several months.

Probably the oldest, in matter of year of graduation, was Edgar N. Drew, ’13, who is now contracting in Chicago Heights, Illinois.

Carl Gerfen, ’31, is now located at 39 Fredlinghuysen, Battle Creek, Mich.

Donald T. Jordan, ’35, after gaining valuable experience in the field, on the big San Francisco-Oakland suspension bridge, is now working in the Gary office of the American Bridge Works.

Bruce Ihlenfeldt, w’33, trucking magnate, will soon be living at 1425 Bales St., Kansas City, Mo.

Withrop M. Wadsworth, ’14, made his first return to Illinois in twenty-one years. He gave us much valuable information regarding the Mnesicles chapter, of which he is financial adviser. He is a real live-wire, and is now interested in real estate.

Harford Field, w’24, reported a large gain in volume of business at his Hinsdale office.

H. Samuel Kruse has joined the ranks of his classmates and entered upon the ocean of matrimony. He is working with Harford Field.

Kenneth A. Smith, ’35, has removed his wife, daughter and himself to 30 South Thirty-third St., San Jose, California.

Kenneth A. Smith, ’35, has removed his wife, daughter and himself to 30 South Thirty-third St., San Jose, California.

Washington, D.C., is now honored by the presence of a large number of Anthmis men. Included are: Ralph W. Crain, ’30; William F. Crane I, ’28; Milo Janes, w’23; George L. Lindeberg, ’18; John E. Lundstrum, ’29; James E. Moorhead, ’33; Raymond E. Olson, ’24; and Bert Thorud, ’18.

Harry J. Harman, ’30, has transferred himself to the design department of the Department of Architecture at Oklahoma A. & M. College, Stillwater, Okla. His home address is 412 Husband St., Stillwater, Okla. It is Harry’s design on the directory cover.

Russell P. Burkle, w’34, is still in Indianapolis.

William J. King’s, w’34, new address is 604 East 13th Street, Indianapolis, Ind.

George F. Fritzinger, ’35, lives at 9705 W. Main St., Moline, Ill. Marvin Patterson, w’31, now residing at 2450 N. Meridian, Indianapolis, Ind., has been appointed as Grand Council Deputy for the States of Indiana and Illinois, the appointment being made by Dwight Ely, W. G. A. Patterson will act as a clearing house for information covering the two States. He has always been an “active” alumnus, and we are certain that he will accomplish much.
Alpha Rho Chi Resettles

ADVENTURES IN THE NEW DEAL is a story which several Alpha Rho Chis are telling these days. Seven of the Andronicus brothers have been working with the Rural Resettlement Division of the Resettlement Administration. The story centers around Joseph Weston, an architect of El Monte, California.

Mr. Weston was appointed to do a local subsistence homestead project, which was so successful that he was then appointed regional architect for the ninth region which includes five southwestern states. Within a few months he was summoned to Washington, D.C., as chief architect and engineer for the rural resettlement program.

Along on this sky-rocket ride Mr. Weston took seven Alpha Rho Chis, most of whom had worked for him in his home office before he entered the resettlement work. To the regional office in Berkeley went Whitling Thompson, Whitney Smith, Charles Klungerman, John Cooke, Tom Shive, Les Tanner, and Christian Coate as head designer. All but Tanner went on to Washington with Mr. Weston.

A typical resettlement project consists of forty farms of about forty acres each. After proper soil, climate, and market conditions are found, the project is laid out and all buildings are constructed. Forty families are then found who are attempting to work worn-out soil. These old farms are bought by the government, turned into grazing lands or reforested, and the families are moved to the new farms which are paid for by long-term financing.

“The point of this whole resettlement is,” stated John Cooke, “that through cooperation the small farmer is brought all of the services of experts in soil erosion and conservation, agriculture, marketing, engineering, architecture, and group planning. Even the chicken houses and pig pens are designed to fit into the plan as a whole.”

The trip to Washington has been more than just a job to most of these boys. Cooke says that he has really learned his U. S. geography. It was a honeymoon for Mr. and Mrs. Thompson and Mr. and Mrs. Smith.

Stars and Bars

Illinois Alumni

By GEORGE F. FRITZINGER

HOMECOMING at Anthemios was successful even though the cause of the Illini was lost to the snarling Wildcats. A larger turnout than ever before. The active chapter did an excellent job of welcoming us. The decorations, even though not prizewinners, were good; very colorful and attractive. The following members presented themselves at some time or other at the chapter house: Palmer, Lendrum, Anderson, Arrasmith, Auble, Borgeason, Buck, Cole, Deuchler, Drew, Faris, Field, Fraser, Fritzinger, Gartner, Gerfin, Bernard E. Hult, Richard E. Hult, Ihlenfeld, Jordan, Kerberg, King, Mayne, Mitchell, Patterson, Priestly, Purdy, Radenz, Schaefer, Schuyler, Steimann, Strong, Stubenrauch, Sutton, Wadsworth, Wedberg, Wendahl, Wenthe, Ziemann, and Wildermuth.

The formal alumni meeting was called to order immediately after the game by temporary President William W. Faris, '33. Faris was unanimously elected president, as was Mayne to office of treasurer and Fritzinger as secretary. The latter made a report for the directory committee in the absence of William W. Anderson. He stated that the temporary directories would be distributed at the conclusion of the session, and requested the cooperation of all alumni in giving all assistance possible to Bill Anderson in preparing the permanent directory. There are still twenty copies of the directory left, and any member who sends in his dollar for dues will receive his copy.

Financial discussion regarding the alumni and active chapters occupied most of the time, with Wadsworth, Field, Stubenrauch, Ziemann and Strong presenting their various ideas on the subject. A financial committee was appointed—Wadsworth, Field and Mayne—to delve further into the situation and arrive at something definite.

Stars and Bars

Andronicus Joins Social Council

By W. M. MANN

THE Andronicus chapter for quite sometime has felt the need of becoming more closely affiliated with the university as a whole rather than just the College of Architecture, and more closely connected with all of the houses rather than just those in the professional council. In our campaign to “Become known on Campus,” we have taken two major steps which are as follows: First, we have joined the Social Council, which brings us in direct contact with all of the large social houses. Second, we have moved to a new location which is in the center of fraternity row. We are all quite pleased with our new house because of its larger capacity, and its closer position with respect to the College of Architecture.

This semester we have pledged twelve prospective architects and one student of fine arts. In honor of our new group of pledges we had a supper dance at the Pacific Coast Club. It was one of the best dances the house has had in quite sometime and was enjoyed by forty couples.

Earlier in the semester we had a house warming dance, which was well represented by the alumni as well as the pledges and actives.

About two-thirds of the house attended the game at Stanford to witness U. S. C.’s (13-7) victory over the “Redskins.” A grand and glorious time was had by all; some made their trip educational, taking in the Berkeley campus, including the School of Architecture; the Stanford campus; and as much of San Francisco as possible; some went for a rest; and others, well just for the ride.

The Andronicus chapter feels indeed privileged in having the presence of the following Alpha Rho Chis: Savo Stostitch, and the Wiseman brothers, from Anthemios; and last but not least Clifford James, who has just been appointed W. G. E. of the Grand Council, and who hails from Dinoocrates of Texas.

The Editor's Mail Box

ANTHEMIOS

William Anderson, '33, is the Illinois man in charge of publishing The Anthemiou Alumni Directory. He did a very fine job. If you are interested in obtaining a copy, write Anderson at 223 A Madison St., Jefferson City, Mo.

Kenneth Smith, '35, is working for the architectural firm of Higgins & Root (Root, Alpha Rho Chi, Mnesicles) and may be addressed at 30 S. 33rd St., San Jose, Calif.

ANDRONICUS

Julian E. Garney, Hon., Rm. 1203, 71 West 45th St., New York City.

DEMETERS

William T. Halligan, '33, 1560 Northwest Blvd., Columbus, Ohio.

George W. Wegner, '21, is with The Building Construction Co., Contractors, 160 N. La Salle St., Chicago, Ill.

Iktinos Praises Detroit Alumni

J. VAN DIS

IKTINOS chapter began the school year with but thirteen actives. Unprofitable though they were, the results of the rushing season did not disappoint us, and we have continued our efforts to get good men into the Fraternity until at the present time we have an active group of twenty-two. The chapter has acquired a new spirit, has thrown off the pessimism of the past lean years, is looking forward to possible new achievements. Through the interest and able efforts of our Detroit Alumni Association we are now free of financial burdens and are no longer carrying a deficit.

The J-Hop decorations received the artistic attention of an A.P.X in the person of Ruifrok who made the designs for the committee. They were very successful, their simplicity appealing to the modern senses of the dancers. George Sprau is serving with the University Men's Council this year, having been elected last spring. We are well represented in the Senate of the Architectural Society, and we are hoping to place a man on the Senior Prom Committee. "Exceptional" applies to our New Year's Dance which was held in the middle of January at the Chapter House. Preceded by a formal dinner, it turned out to be one of the best parties we have had for some time. The annual Greenwich party is scheduled for the second and third of April. It promises to be better than ever this year. A good many invitations have been sent out to alumni in the vicinity in the hope of getting them here to talk over things past and present and to help us enjoy the party.

Last Thursday we had an enjoyable evening when most of the Architectural School faculty honored our House with their attendance at a stag affair. After a delicious meal—which is the usual thing served up by our cook, you must stop in and see for yourselves—we offered a prize for the best caricature drawn of a colleague. Our worthy professors really outdid themselves, and it was very difficult to award the grand prize. The remainder of the evening was spent in general relaxation with games and plenty of smokes for all to enjoy.

Two former members were recently married, both of them selecting mates from our own University of Michigan. Bill Warrick and Laurel Wolff did the King of England one better last December 10. They were married in Cleveland, Ohio. Following Warrick's withdrawal from school in February they moved to Lakewood, Ohio, where Bill is managing Skyways, Inc. an air service company. Dale Hillier, w'36 and Dorothy Roth from Oak Park, Ill., who is an Alpha Phi on campus, were married in the chapel of the U. of M. League early in February. Hillier is working for a Detroit architectural firm while his wife is finishing her work in decorative design here at the University.

Anthemios Wins Founders' Day Trophy

LAURENCE W. SCHWALL

ON MARCH 2 the University of Illinois, as part of its first Founders' Day celebration offered a trophy for the float which best symbolized the standards of the University. Several of the men in the house devised a good design for a float; we worked several days on it, and as a reward for our labor, we were named the winner of the trophy.

During the whole of this year we have been making a concentrated effort to fill the house. We had several rushing dinners, and as a result, by the first of May, the house will be filled to capacity.
